

Are you tired and frustrated? You've been working long hours and can't remember if you mailed in the payment. Or you don't really have the time to sit down and write out all those checks and keep track of them.

You thought you sent in the payment before you went on vacation. Now its late! There's a late fee to pay!

I'm tired of the process of filling out and mailing in my checks month after month. It's too much of a hassle and now postage is up to 34 cents!

I want the Automated Payment Processing System !

Automated Payment Processing

Here is how it works

When you fill out an Automated Payment Processing Authorization form it is given to your bank, authorizing us to print a check against your account each month for a specified amount made payable to _____.

We print a check, pre-authorized by you, for payment and deliver it on time, every time, month after month. **There is no computer access into your checking account.** We simply recreate your check, which is made payable to _____, on the agreed-upon day each billing cycle.

The amount of the payment will be deducted from your account **by the bank** and detailed on your monthly bank statement. The bank deducts this payment from your account the same as if you wrote the check yourself.

Think of how convenient the Automated Payment Processing system is when it works so well with your busy schedule. No more checks to write, envelopes to address. Just think, every time you write a check, it is costing you 34 cents to pay your bill.

Return this portion with a voided check

Automated Payment Processing Authorization

Your Name (Please print) _____

Your account will be debited on the _____ day of each month for _____ fees.

Signature: _____ Date: _____
